

MUHAMMAD ABDULLAH KHAN

AI/ML Engineer — Agentic Systems & LLM Solutions

Ingolstadt, Germany | +49 179 1576302 | muabdullahkhan28@gmail.com | [linkedin.com/in/ah-khan-51566827a](https://www.linkedin.com/in/ah-khan-51566827a)

PROFILE

AI/ML Engineer with hands-on experience building and deploying multi-agent LLM systems, retrieval-augmented (RAG) pipelines, and production conversational AI using Python, LangChain, and CrewAI. Comfortable working across the agent stack — prompting, tool integration, retrieval, and evaluation — and experienced in explaining technical AI concepts to both technical and non-technical audiences through an instructional role. Currently pursuing an M.Sc. in Artificial Intelligence & Autonomous Systems at Technische Hochschule Ingolstadt (THI). Looking to bring this builder's grounding in agentic AI into a client-facing engineering role that bridges solution design, configuration, and delivery.

RELEVANT SKILLS FOR AGENTIC AI SOLUTIONS

Agent Architecture: Multi-agent orchestration (CrewAI), prompting, RAG/retrieval, tool use, context pipelines
Model & API Integration: LangChain, Groq API, Gemini API — integrating and comparing multiple LLM providers
Deployment & Evaluation: End-to-end ML/LLM deployment lifecycle; hands-on model evaluation through applied teaching labs
Programming & Tools: Python, SQL, Streamlit, SQLite, Git, Jupyter, VS Code
Communication: Translating complex AI concepts for mixed technical/non-technical audiences (teaching & mentoring)
Languages: English (fluent), Urdu (native), German (A1 — actively learning)

BERUFSERFAHRUNG

Instructor – AI & Machine Learning

Jan 2025 – Present

Corvit Systems Limited

- Delivered AI/ML instruction to diverse student cohorts as part of the NAVTTC programme, translating complex agent and model concepts for learners with no technical background — direct practice for explaining agentic AI to non-technical stakeholders.
- Designed and guided hands-on labs covering model evaluation and algorithm assessment, building a practical foundation in defining and running test/eval criteria.
- Simplified neural network, regression, and classification concepts into clear, structured teaching material.
- Mentored aspiring AI/ML professionals on foundational and applied skills for entry-level roles.

AI/ML Engineer

Apr 2024 – Dec 2024

Nexify Technologies

- Built and shipped a production conversational AI chatbot using NLP techniques to automate user interactions — end-to-end ownership from prototype to live deployment.
- Managed the full deployment lifecycle of ML models into production, including scalability and integration with existing systems.
- Performed data preprocessing, cleaning, transformation, and feature engineering to prepare models for production use.
- Applied NLP techniques — text classification, named entity recognition, sentiment analysis — within chatbot frameworks.

AGENTIC AI PROJECTS

Travel Agent (AI-Powered Multi-Agent System)

Stack: Python, Streamlit, CrewAI, LangChain, SQLite

- Built a multi-agent AI travel planner with autonomous agents that research destinations, generate itineraries, and estimate costs — direct, hands-on agent orchestration experience.
- Designed an interactive Streamlit front end and integrated SQLite for persistent storage of user queries and generated plans.

AgenticAI PDF Assistant

Stack: Python, Phi Data, Groq

- Engineered an agentic document assistant that retrieves and answers user queries from complex PDFs in real time, combining the Groq API for fast inference with Phi Data for improved retrieval accuracy.

Language Translator Application

Stack: Python, LangChain, Streamlit, Gemini LLM

- Built a multi-language translation app with a robust, reusable prompt pipeline supporting any source-to-target language pair, powered by the Gemini LLM via LangChain.

AUSBILDUNG

M.Sc. Artificial Intelligence & Autonomous Systems

Since 2026 (1st Semester)

Technische Hochschule Ingolstadt (THI) | Expected graduation: 2028

Bachelor of Science – Electronics
Information Technology University, Pakistan

08/2020 – 07/2024

FSc Pre-Engineering
Punjab Group of Colleges, Pakistan

2018 – 2022

ZERTIFIZIERUNGEN

From Basics to Generative AI — NVIDIA, February 2025
